

# Inelco Hunter Limited

specialist supplier of electronic components & solutions

## RoHS Policy

**RoHS -Directive 2011/65/EU (RoSH 2) on the restriction of the use of certain Hazardous substances in Electrical and Electronic Equipment and Directive (EU)2015/863 to amend annex II to RoHS 2 (RoHS “3”)**

Since the implementation of the **RoHS** legislation on 1st July 2006, **RoHS 2** on 21st July 2011 and **RoHS 3** on June 2015, INELCO Hunter Limited has maintained a policy of supplying compliant product unless specifically requested otherwise.

Customers requiring non-RoHS components are requested to check beforehand as the leaded options may not still be available, as many components are no longer manufactured in this form. Customers are also requested to always make their RoHS requirements clear on their purchase orders, at time of order placement.

Many manufacturers' part numbers have been updated to indicate their RoHS status – but there are some that have not. If you require confirmation of the status of any particular part then please contact our Engineering department on the following email address:
