

RoHS Policy

Since the implementation of the RoHS legislation on 1st July 2006 updated 2011 & 2015

RoHS 2 Directive 2011/65/EU, July 2011 and, RoHS Directive 2015/863/EU, RoHS 3 June 2015. Inelco Hunter Limited has maintained a policy of supplying compliant product unless specifically requested otherwise.

With RoHS compliance being required for CE marking of products. RoHS 2 also added in 2019 Categories 8 medical devices and 9 Monitoring & control equipment with additional compliance & record keeping requirements compliance by July 22.

Customers requiring non-RoHS components are asked to check beforehand whether the leaded options are still available, as many components are no longer manufactured in this form. Customers are also requested to always make their RoHS requirements clear on their purchase orders, at time of order placement.

Some manufacturers' part numbers have been changed to indicate their RoHS status - but many have not.

If you require confirmation of the status of any particular part then please contact our Engineering department on the following email address:
