

## Enjoy design flexibility for your application, with our NEW borderless 4.3" touch display

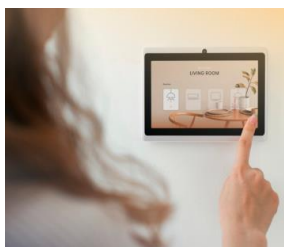

The benefit of a borderless display is the flexibility it brings, in that the outline dimension is the same size as the backlight frame dimension. This allows greater scope in your design.

### We are pleased to announce our 4.3-inch borderless display, JXT480272T016-ZBC01.

Featuring a full viewing angle, RGB interface with 450 nits and 20K MTBF. Recommended applications include measurement devices, smart home control, medical applications and home appliances.

*Smart Product, Smart Choice*

Item	Description
Display Resolution	480 * 3 (RGB) * 272 Dots
